

January 29, 2026: On the Continuing Harassment that I Face in Public

Today, I went to the grocery store and was met by a very obvious criminal 'gangster' with a message for me. The man was so troublesome to the establishment that he was removed from the grocery store and their team offered to escort me to my car for my protection after I finished shopping. Please note that this man had two men in military fatigues near him 'shopping' in a very small grocery store.

His messages to me were three-fold (in addition to his threatening demeanor and insults to my personal appearance):

- 1) "The FBI is watching you";
- 2) "The military is watching you"; and
- 3) "Donald Trump is the king of New York."

For those of the world that are not criminal defense attorneys, I am advising you that these are the signs of a non-case.

Nobody is coming to arrest me and nobody is seriously watching me or attempting to build a criminal case against me.

If so, this would be a serious compromise to the integrity of their investigation and they would be doing everything that they can to prevent it from occurring.

Unfortunately, though, we are actually being targeted by a criminal that is operating from inside of the USA government and that criminal's name is being clearly mentioned and forced over our lives day and night.

Really, a random criminal is going to approach me at the grocery store and just blurt out to me that 'Donald Trump is the king of New York' after threatening me and asserting that I am being watched by our country's highest forms of law enforcement?

Donald Trump, as I have been explaining, is using both dirty criminals inside of, and outside of the government, to carry out an unlawful scheme for gaining 'power' over America, the states, cities, and really - the entire world.

This is what happens when a prostitute-abusing extortionist lies his way into the oval office.

May this be a lesson to everyone about how important it is to 1) truly end the practice of prostitution; and 2) guard against the inclinations that are apparent in Donald Trump from ever reaching positions of power.

These are not 'good' people. These are not 'honorable' people.

These are low-life degenerates that are abusing others to get what they want.

And now, they are being enabled and emboldened inside of government and military offices.

America, and world, there is a real serious problem developing.

These are not 'cos-play' Nazis. This is real-life, actual, Nazi-ism coming from inside of the highest positions of the United States government.

This is not a time to minimize the dangers. This is a time to express very loud and clear: **ALERT! WARNING! ALERT! DANGER!**

To complete the record of events: on the way to the store a vehicle was clearly driving in front of me with large signage that said: Evil Dead, etc.

And on the way back home from the store, another vehicle placed directly in front of me says:7 (Troops) 'P BCK),

while this guy on the side of me makes a noose or a snare (remember the vehicle in the driveway beside my house had the same image of a snare on it the day the man threatened me

with a gun in my front yard) . . .

... and the car beside me has a license plate that reads . . . 666. (It pulled up to block the man making the snare on the side of the road).

TO ANYONE VIEWING THESE DOCUMENTS: This is what it looks like to be followed around by a gang of people that are receiving information from inside of the USA government's surveillance state and then are posting 'mirrored' images all around your life as you move about your business.

I receive these 'echoes' all of the time. People follow me and they want me to know that they are doing so. Their method is primarily by

reflecting my life in their 'signs' - but it doesn't end there as I wrote about at the beginning of this document.

I am being followed and threatened by people that are randomly representing themselves as Donald Trump this, that or the other. Donald is a criminal. Donald is a threat to society.

Do not overlook the warning signs of a seriously demented psychopath that cannot quit abusing other people.

Donald Trump is truly (as a criminal defense attorney that would know) a danger to the world.

Chris Carlin,
January 29, 2026

(And yes, loud vehicles did accompany the writing of this document the entire way through it - 'approving' edits that I made, etc)
